

**Ground Up Junior Interior Kits**

These interior kits are a great way to freshen up your ride! Ground Up junior kits include all of the basic items needed to spruce up your interior. These kits feature "out of the box" pre-assembled door panels from PUI. This means that they are ready to install with moldings and window felts where applicable. Our seat covers are also crafted by PUI and feature all of the correct grains, materials and colors as original. We finish off these kits with complete PUI headliner and side sail kits which feature OEM grains and colors and a brand new ACC carpet which duplicates OEM style carpets. You will not find a higher quality interior kit on the market!

### 1967-1969 TMI Sport Seat Upholstery

TMI Sport Seats are the best way to upgrade your stock seats without having to sacrifice your original interiors style and appearance. TMI

Sports Seats attach directly to your existing stock frames, utilizing the factory attachment methods. The result is a heavily bolstered seat that is stock in appearance but much more supportive and comfortable than the original. *Note: Sport Seat Upholstery must be purchased in conjunction with Sport Seat Foam. Sport Seat Upholstery will NOT fit over your stock foams. Rear Upholstery is stock and will fit over your stock foams.*

### 1967-1969 TMI Sport R Seat Upholstery

TMI's new Sport R Seats for the Camaro hold on to the iconic styling cues that make a Camaro interior so easily recognizable. However, these new

Sport R Series seats do a great job of modernizing the originals by adding a french seam stitched in a contrasting thread color around the perimeter of the seats and by accenting the insert sections of the seats with a matching black unisuede. *Note: Sport R Seat Upholstery must be purchased in conjunction with bucket seat Sport Seat Foam - front bucket Sport Seat Upholstery will NOT fit over your stock bucket foams. You can use your stock foam for the rear covers.*

### Sport R Door Panels

TMI's new Sport R Door Panels for the Camaro hold on to the iconic styling cues that make a Camaro interior so easily recognizable. However, these new Sport R Door Panels do a great job of modernizing the originals by adding a french seam stitched in a contrasting thread color and by accenting the insert sections of the door panels with a matching black unisuede. This result is a very modern looking door panel that takes hints from the classic Camaro style - and fits right in place of the original panels!

- Suede inserts • Choice of colored stitching
- Masonite MDF back board • Metal top plates (1968-69)
- Window Felts (1968-69) • Pre-cut holes in board for door handles and cranks • Includes lock grommet and chrome strip (1968-69) • Offers a modern look for your classic

### Sport XR Molded Door Panels

TMI's new Sport XR molded Door Panels for the Camaro hold on to the iconic styling cues that make a Camaro interior so easily recognizable. However, these new Sport XR Door Panels do a great job of modernizing the originals by adding a French seam stitched in a contrasting thread color and by accenting the insert sections of the door panels with a matching black unisuede. They also incorporate a molded-in arm rest similar to the factory deluxe door panels. This result is a very modern looking door panel that takes hints from the classic Camaro style - and fits right in place of the original panels!

**Dakota Digital RTX Gauge Kits**

Designed after stock Camaro clusters, these all-new packages look like a simple speed/tach combo until you turn the key, then four auxiliary readings appear! Oil pressure, coolant temperature, fuel and volts are comprised of LED bars; invisible to the average observer but front and center for the driver. Each pod has a TFT message center for additional information at your finger tips. Although the graphic styles vary between 1967 and 1968, the systems will interchange between the years, so choose your preferred or period-correct version! Will fit directly into stock or reproduction gauge bezels, sold separately. The RTX series is the latest from Dakota Digital, focusing on retaining that stock look without sacrificing the late-model features you love. Every effort has been put forth to incorporate OEM design elements regarding the layout, face styling and indicators. A casual glance may dismiss these as original equipment, but once you hit the switch and the LED backlighting comes on in your favorite color scheme, all doubts will be removed. Starting from scratch, CNC machined housings are filled with electronics designed and built in-house, helping Dakota Digital once again raise the bar for aftermarket instrumentation. The high-definition TFT message centers can be fully configured to display just about any piece of information needed or just leave the vintage-looking tumbler odometer on the screen for a totally stock appearance. As you've come to expect from Dakota Digital, the RTX series utilizes a central control box to make installation and setup as easy as possible. Bezel not included, shown for visual/presentation purposes. The RTX system uses an OEM or reproduction style bezel.

**Dakota Digital HDX Gauge Kits**

Ushering in a new era of muscle machines, Camaros have long been turned into hot rods. Keep the tradition alive and bring yours up to spec with this direct-fit instrument system! It attaches directly to a stock or reproduction bezel (available separately) and supplies you with six analog gauge sweeps and a pair of high visibility TFT message centers. Available with your choice of black or silver alloy gauge-face styling, each HDX system allows the user to select independent illumination colors for the gauge readings and needles, as well as the message centers. Calibration and personal settings are manipulated with the built-in, capacitive-touch buttons or the available Bluetooth App. for Apple and Android devices. Each needle hub is black nickel plated spun-aluminum to match the buttons. All HDX instrument systems feature dead-faced indicators (turn signals, high beam, check engine, cruise control, parking brake, plus two user-definable) and a red, settable warning light for each gauge. With our central control box, installation is greatly simplified with vehicle-harness sourced signals and supplied, solid state sending units connecting cleanly to their respective terminals.

**QuietRide AcoustiShield**

The QuietRide AcoustiShield kit is a multi-stage automotive and sound dampening system to give your muscle car the quiet riding comfort found in today's new cars. AcoustiShield kits are designed on current state of the art auto acoustic technology to insulate and control the noise, vibration and heat in the passenger cabin. Kits are pre-cut and come with easy to follow installation instructions: Everything you need to do the job right!

The first stage consists of pre-trimmed, self-adhesive sound damper pads which are bonded to strategically located trouble spots to control body panel vibration and noise. These spots are mapped and labeled in the detailed instructions.

Complete Kits include Body, Cowl, Floor, Roof (except convertible) and Trunk Floor Kits.
