COLD-11AL

COLD-540MFK

1962-79 Cold Case Radiators

These COLD-CASE radiators are TIG welded 100% aluminum. These radiators have dual oversize 1" cooling rows making them more efficient than 4 1/2" rows seen on 4 row models. Cold Case aluminum radiators cool 20% better than OEM copper radiators and are more than 50% lighter. They are original in appearance with OEM style stamped tanks for strength and that OEM original look. Once painted, they look like originals to all but the concourse fanatic. Each radiator is pressure tested, direct fit and carries a Lifetime Warranty!

Vintage Air SureFit kits

Vintage Air SureFit kits are the most complete, bolt-in climate control systems available. SureFit kits install easily and utilize most of the factory sheet metal and body features and are engineered as "vehicle specific" complete systems. Our SureFit kits are designed to place the evaporator case and air duct hoses behind the dash for a factory-clean look. In most cases, the SureFit system will be controlled by your stock dash controls using our exclusive patented "Cable Converters." In some applications, a new "factory" look control panel is included with the kit. All SureFit systems provide full OEM-style operations including air conditioning, floor or vent exit heating and a powerful dehumidified defroster. To retain a true factory look, the A/C air exits through the factory dash louvers, if originally equipped in your car's dash. SureFit kits also offer the most complete and straightforward installations available anywhere. The Gen IV is Vintage Air's most powerful and intelligent climate control system available. The Gen IV uses an exclusive fully electronic microprocessor control system that eliminates cables or vacuum connections. Separate high-capacity copper parallel-flow heat coil and aluminum plate-and fin-cooling coils provide outstanding performance and instant temperature adjustments. Complete kits include the evaporator unit and mounting brackets, louvers (where required), duct hose, wiring harness, patented Electronic Cable Converters, compressor, engine brackets, condenser with brackets, preformed refrigerant lines, drier, fittings, hardware and installation instructions.

Features Include:

- Fly-By-Wire fully electronic servo motor controls with no cables or capillary tube to route
- Infinite just-right-temperature air blending • Infinite blower fan speed adjustment (3-speed on factory air models)
- High-volume dehumidified defrost mode • Separate high-capacity aluminum plate & fin cooling coil
- Copper/brass CuproBraz™ parallel-flow heater coil • Mounts behind the dash • Uses your factory system controls with our patented Electronic Cable Converters • Flat steel firewall cover panel • Replacement molded glove box (reduced capacity)
