

# VHX-84B-REG

Dakota Digital VHX Instrument Installation  
For 1984-'87 Buick Regal

Your new VHX-84B-REG kit includes:

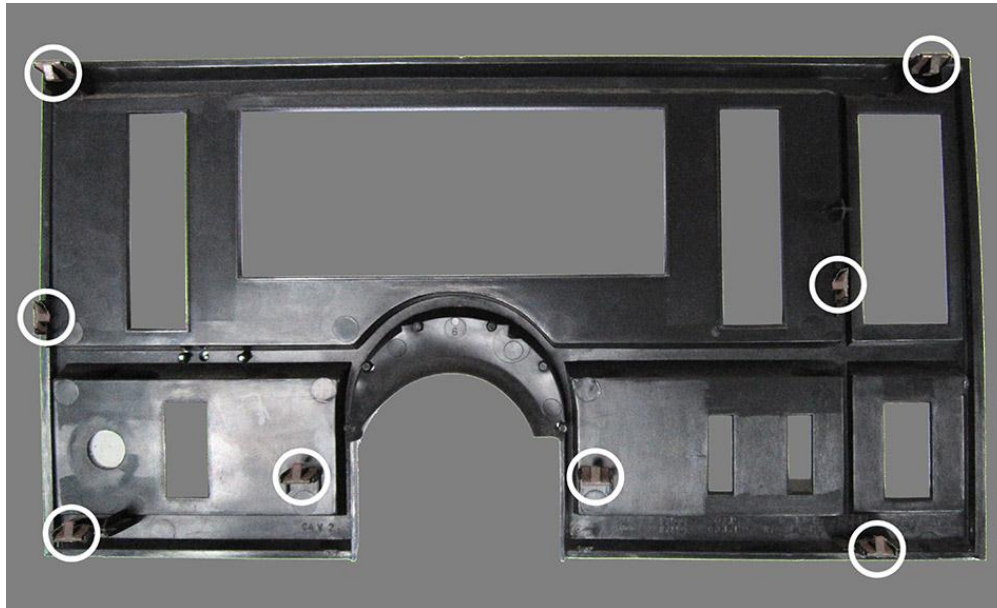

## Installation

1. Remove the gauge bezel from the dash. Now is a good time to clean the bezel.

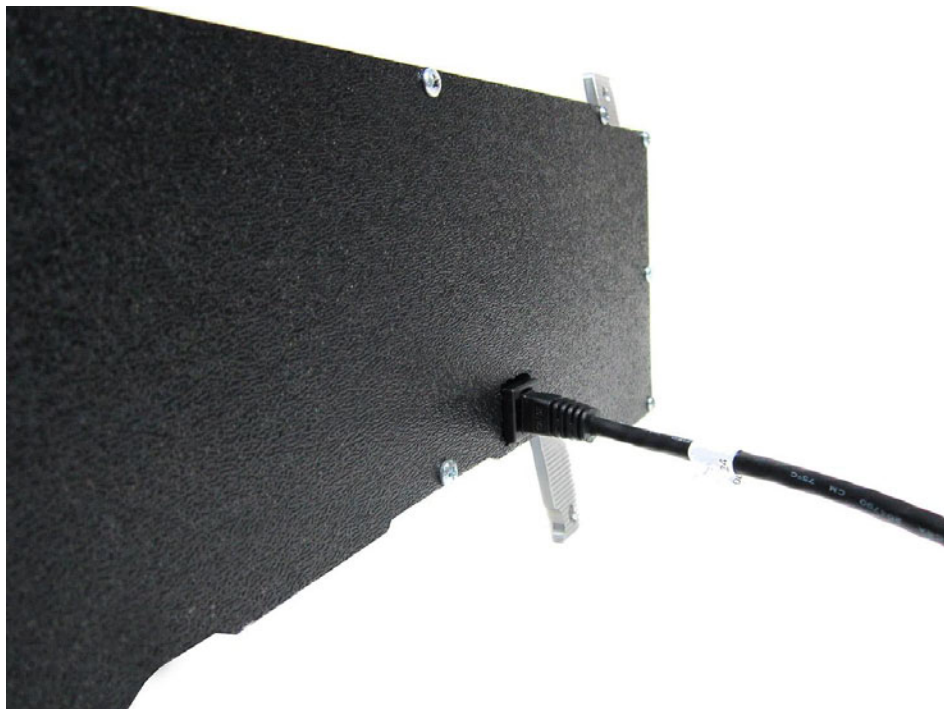

\*The bezel is held in by push-in clips. Note the locations of the clips on the back side of the bezel. Pull near clips when removing the bezel.

2. Remove the stock gauges by removing the four screws securing the gauges to the dash. A 7mm nut driver will work best for these screws. Keep the screws because they will be used to install the VHX gauges.

3. Connect the CAT5 cable to the system so it can be routed and connected to the control box as the instrument system is installed.

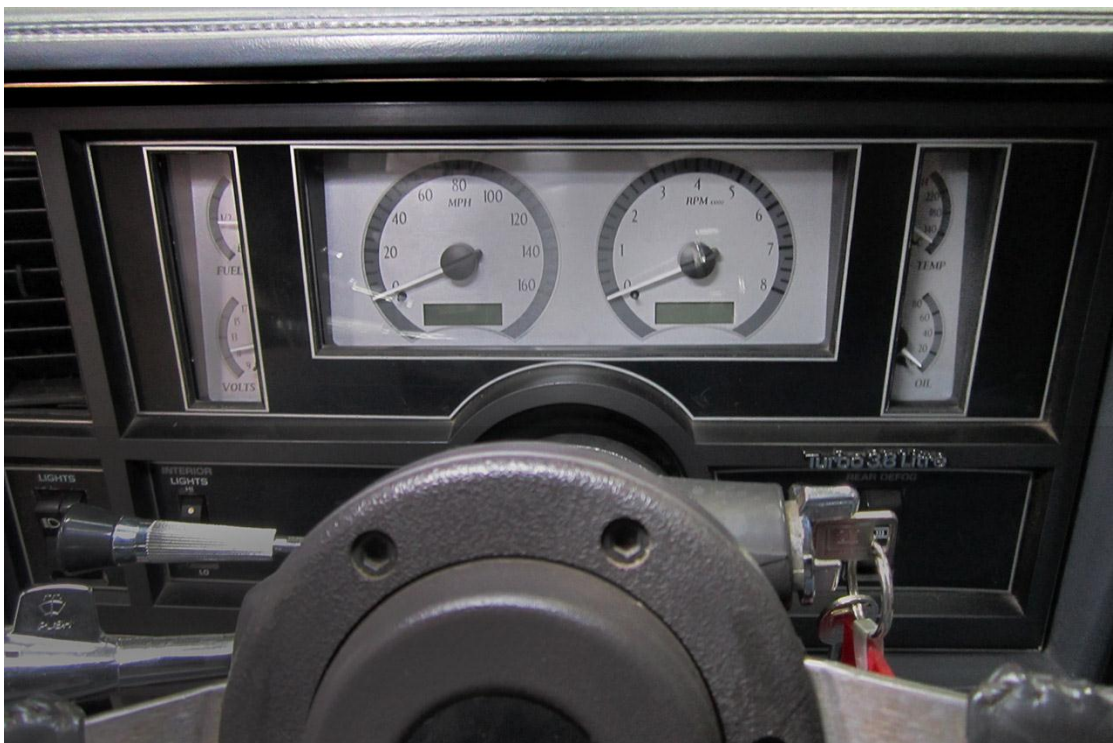

- 4a. Remove the protective tape from the clear lens and install the VHX system into the dash. Watch carefully as you insert the system so you don't scratch or damage the lens.

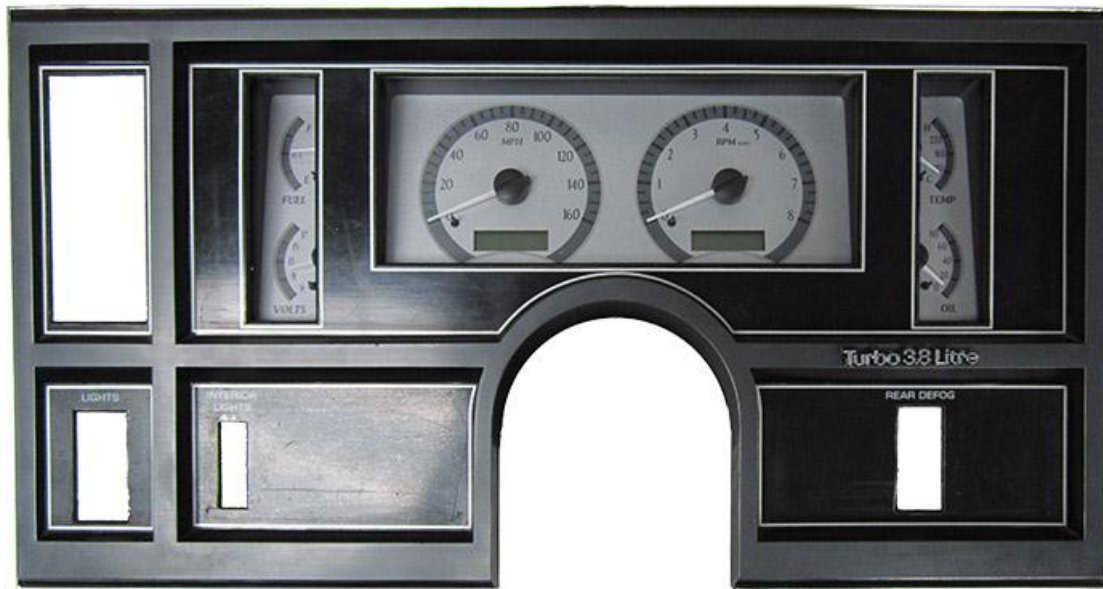

- 4b. Align the four mounting holes and re-use the factory screws to fasten the VHX gauges into the dash.

5. Re-install the gauge bezel.

- Gauge installation is finished and you may now refer to the main manual for wiring instructions to complete the VHX installation.
