Installation Manuals

Main Harness

Control Box

Installation

1. First remove the four screws holding the bezel to the dash. These four screws will be re-used for re-assembly.

2. Remove the four screws holding the gauges into the dash. These screws will be re-used for the RTX gauge installation.

3. Connect the provided harness and the buzzer (optional for audio feedback) to the back of the RTX system.

4. Secure the RTX system to the dash with the original four screws.

5a. Align the bezel over the gauges. Watch carefully so you don't scratch or damage the lens.

5b. The RTX system should align tightly and the lens should sit flush with the bezel.

- Secure the bezel to the dash with the four original screws. Refer to the main manual for wiring instructions to complete the RTX installation.
