

Dash Amp Gauge Instructions

Installation of your new amp gauge can be an easy job when you follow these simple instructions:

1. Look at the 12 point plug on your dash harness
2. Note that one side of this plug says 1-6 and the other side says 7-12.
3. You will see two wires (one solid black one with white stripe) in terminals 3 & 4
4. Simply switch these two wires and your gauge will function properly.
